

Microporous film coated fabric

Silent Coating™

Breathability

Moisture permeation

Windproof

Stretchability

*Differs depending on fabric

A dry, comfortable touch

Microporous wet-type polyurethane film coating keeps the fabric dry even after perspiration, thanks to its high moisture permeability and adequate breathability. Hydrophobic polyurethane is used, meaning the fabric does not deform due to moisture.

Remarkable lightness and stretchability

The extremely thinly coated film maintains the fabric's light weight and stretchability, increasing wearing comfort.

微多孔涂层织物

Silent Coating™

透气性

防潮

防风

弹性

※取决于面子布料

干燥舒适

这种面料具有微多孔湿式PU涂层，透湿性高，透气性适中，因此即使出汗也能保持衣服内部干燥舒适。使用的是疏水性PU，所以也不会因水分引起变形。

令人吃惊的轻量性和拉伸弹性

通过将涂覆层最大限度地薄膜化，可以在不损坏布料原有的轻量性和拉伸弹性的情况下，给人以舒适的穿着体验。
