

TECHNO VINTAGE™ FL

Fabric with silky shading, matte look,
and luxurious vintage feel

- This is a fabric that has a "matte look with a shade", a "luxury vintage look", and a "dull luster that looks like it has been damaged".
- It has the same shaded expression (fibril feeling) as silk viscose, and has a tasteful texture.
- With innovative post-processing technology, it is possible to add functions according to the application, and it can be widely used from single-piece haori to winter clothes.
- We are also developing processing by dyeing products, and it is possible to express a more natural "vintage feeling" and "damage feeling".
